

1. Show Databases result

The screenshot displays a database management tool interface. On the left, a 'SCHEMAS' sidebar lists various databases, with 'LittleLemonDB' selected and expanded to show its internal structure (Tables, Views, Stored Procedures, Functions). The main workspace shows a SQL query: 'SHOW databases;'. Below the query, the 'Result Grid' displays a list of databases. The 'Action Output' pane at the bottom shows the execution history, including the 'SHOW databases' command.

SCHEMAS

- global_super_store_db
- jewelrystore_db
- little_lemon
- LittleLemon
- LittleLemonDB**
 - Tables
 - Views
 - Stored Procedures
 - Functions
- LittleLemonDB_old
- luck_shrub1
